Case study on WASH Community

The collective effort for Water, Sanitation and Hygiene

Fortunately, came across a discussion with team leader of GRAMVIKASH a international NGO working in another one block of Jharsuguda district on WASH, we invited them to Jengapada village and hold a village meeting to sensitize villagers on how WASH will improved their health conditions as well socio-economic conditions of the village. After 2/3 meetings and a exposure to neighboring district where GRAMVIKASH was successfully implemented WASH program before five years. During this visit the group of Jengapada both male and female surprised to see the village was totally ODF as well as 24 hour supply of

In 2015 the org SEWA was intervned in 15 GP of Jharsuguda and five GP of SBP district with a project call Integrated Livelihoods Support Program with the financial and technical support of BRLF. In this project there 3 thematic area WASH, NPM and PGWM taken as pilot program. Out of these three WASH piloting programme implemented in Jengapada village of Kolabira block in which 95% tribal households covering of 112 households.

In the initial stag neither people responsed nor much interested on WASH. It was a big challenge for SEWA to mobilize people as well as mobilize resources for construction of IHL and supply or safe drinking water to targeted Households.

drinking water to each and every households and the villagers maintaining all the infrastructure created by GRAMVIKASH by their own initiative with a corpus fund of 5,00000.00 .

After this experienced the women of Jengapada formed a WASH committee on 20/10/2016. GRAMVIKASH was also agreed to provide financial and technical support for constructions of toilet ,bathroom and water connection to every House hold. In curse of time BRLF building capacity

of key staff of SEWA .

and arranged hand holding support through recourse agency UTTHAN Gujarat.

Now 100% household of Jengapada village has their own toilet bathroom and water connection. The village is ODF and villagers are very much happy, especially women ,old age persons accepted and take over the program with a mobilize of corpus fund Rs 1,12000 towards maintenance of infrastructure created in their village.

Besides this farmers taking second crop and in livestock entire 112 involved in poultry farming (desi birds) and forty household intensively involved goat rearing. During second October 2019 in Gramsabha they proposed for construction of 40 goat shed, 112 poultry shed and 112 azoles tank.

This is a result of intervention focused on WASH with financial and technical support of multi stack holders.
